

I listen to K-love radio network within my community. They serve me by providing positive, encouraging music with a good message, as well as keeping me informed of local interests within my community. If K-love were to be displaced by an LPFM broadcaster providing other programming, it would be a great detriment...k-love provides ONE radio station on the dial on which I am GUARANTEED to hear messages of hope, free from foul language & inappropriate innuendoes. Parents can allow their children to listen to this station unattended without concern of content. This can do nothing but benefit the public in my area and across the country.
